History of Goodwill Industries And Career Development Training Programs

Goodwill Industries is North America's leading non-profit provider of vocational services for people with barriers to employment.

In 1947, two Methodist ministers, one in Texas and one in New Orleans, along with other civic-minded individuals, established Goodwill Industries of Greater New Orleans at a site originally on Chartres Street in the French Quarter. During the ensuing years, Goodwill Industries moved physically to Jackson Avenue, Dryades Street, and finally to South Jefferson Davis Pkwy in 1975. Goodwill Industries of Southeastern Louisiana (SELA), Inc.'s current President is William L. Jessee.

Goodwill Industries of Southeastern Louisiana, Inc. is a member of Goodwill Industries International. It is a non-profit agency whose leadership is provided by a Board of Directors. Its mission is to offer opportunities to people with disabilities and other barriers to employment to improve their economic self-sufficiency through training, education, support services, and employment.

Goodwill Industries of Southeastern Louisiana, Inc. is currently in its seventy-first (71) year of service. Over this sixty-six year period Goodwill Industries has moved economically from two employees to approximately 650 with an annual income of more than \$26 million; socially, the growth has gone from zero programs to 18 programs and services.

Goodwill Industries has many unique aspects because it is a unique agency. Goodwill Industries provides services to a variety of participant groups including welfare recipients, disabled people (including all disabilities), school dropouts, the homeless, ex-offenders, and veterans as well as the general public. Goodwill Industries' programs attempt to emphasize and modify all those work habits; behaviors and attitudes that could affect an individual's potential to become and remain employed.

Goodwill Industries addresses these concerns through a Career Readiness and Skills Training programs, a unique blend of providing skills and teaching how to appropriately use those skills. Career Readiness is designed to identify problem areas and improve attendance, punctuality, work quality and quantity, supervisor/co-worker relations, job tolerance, flexibility, following work rules and regulations, work related skills, self-esteem, interpersonal skills, listening skills, self-confidence, self-image and enhance self-discovery. Programs have expanded to include Basic Adult Education Prep Classes, Case Management and technical skills training (Broadband Technology, START (Hospitality), Digital Literacy, Microsoft Office Technology, Medical Billing and Coding, and Medical Office Administration Assistant).

There are currently twenty-two (23) Goodwill Industries Retail stores throughout Greater New Orleans and Baton Rouge. In November 2012, Goodwill Industries opened a new satellite office in Baton Rouge. Workforce and Contracts currently run operations at this site. Expansion is always a part of our planning. Money, buildings, staff . . . all have demonstrated the growth of

Goodwill Industries, but the real growth comes from the number of people served and placed on jobs by Goodwill Industries. In 2017, we served approximately 2,938 people and placed 1,306 into competitive employment. Collectively these statistics say a lot about the effectiveness of Goodwill Industries' services. Individually, each success that Goodwill Industries played a part in helping someone finds a new direction, discover a hidden skill, and gain a sense of self-worth and hope for the future.

In August 2018, Goodwill Industries of Southeastern Louisiana applied for the trade name Goodwill Technical College and was granted permission by the state of Louisiana. In addition, Goodwill was granted permission to move into its new location, 2740 Canal Street, New Orleans, Louisiana.

The skilled training format called Projects with Industry contains a built-in linkage with industry. The concept is to get businesses involved in the training program so that participants are trained to meet the needs of industry. Each skill area has a Business Advisory Council which helps to determine entrance criteria, curriculum, hands-on training, networking, and placement. Upon completion of skilled training the client is assisted in job placement activities. However, the agency cannot guarantee students will be placed in employment. If placed, a thirty, sixty and ninety day follow-up is completed to ensure job satisfaction, success and job retention.

Another unique aspect of Goodwill Industries is the additional services offered. Clients can avail themselves of the services of a counselor who can provide community resource assistance and/or counseling referral services. Goodwill Industries' Sales and Contracts Departments offer professional services, advice, hands-on training and possible employment in custodial work, grounds maintenance, cashiering, sales clerk, stock clerk, supervisor and store management, receptionist, customer service representative, warehouse worker, and fork lift operator.

Goodwill Industries is unique because it blends a variety of aspects together to operate a comprehensive and quality vocational program. Our experience shows people do not usually lose jobs because of skill level, but because of issues addressed in Goodwill Industries' work readiness component: largely attitudinal and problem solving issues.

It is these points of emphasis that makes the Career Development and Training Programs the path to successful employment that it has been for thousands of people in our community.

William L. Jessee, President

Our Mission

Goodwill Technical College offers quality, occupational education in a supportive environment that prepares students for competitive employment to enhance their economic self-sufficiency and quality of life.

Our Values

- Respect for those we serve
- Service to the individual
- Assumption of responsibility by the individual (a hand-up, not a hand-out)
- Quality Service
- Thinking globally
- Collaboration
- Stewardship, financial responsibility, and efficient use of resources
- Autonomy of the member organization
- Best practices and innovation
- Diversity
- Heritage
- Volunteerism

ADMISSIONS POLICY AND PROCEDURES

Goodwill Technical College Certified Training Programs welcomes all eligible prospective applicants. This School assures equal opportunity for all qualified persons without regard to race, religion, sex, national origin, age, disability, marital status, or veteran's status in the admission to, participation in, or employment in the programs and activities of the School. Goodwill Technical College does not discriminate on the basis of race, color, gender, religion, national origin, age, or disability.

Prospective applicants seeking admission to Goodwill Technical College Certified Training Programs must meet the admission requirements for the category/program under which they are entering. Applications may be submitted at any time during the year.

Application should be completed as early as possible prior to the semester period of anticipated enrollment. Applications may be completed and submitted at Goodwill Technical College, 2740 Canal Street, New Orleans, Louisiana 70119.

A non-refundable Registration fee of \$50.00 is due upon registration. The application fee is transferable to the next semester so long as it is paid in the same fiscal year (July 1 - June 30). It is the responsibility of all applicants to familiarize themselves with the rules and regulations of the School as stated in this catalog.

General Admissions Requirements

In accordance with the requirements of Louisiana R.S. 17:3151 (Acts 1985, No. 185, Section 1, and Acts 1987, No. 214, Section 1), all male applicants between the ages of 18-25 are required to register for the federal draft under the federal Military Service Act prior to enrollment at this institution. Other requirements vary according to admission status, educational intent and other established criteria. Applicants are notified of admission requirements upon receipt of the application by the Office of Admissions.

Applicants who have not submitted all required documents prior to admission may be admitted provisionally to Goodwill Technical College. Provisionally admitted applicants are given 30 days after the start of the semester to submit all required admissions documents. If the student fails to provide requested documents, a registration and transcript hold will be placed on his or her academic records.

Admissions Procedures for Disabled Population

- A client may enter the Rehabilitation Programs when referred by the LRS Office. These programs are referral based and funded by Federal and the State of Louisiana.
- The vocational assessor will review the referral information for completeness and correctness of information provided.
- If the information is incomplete or too outdated, updated information will be requested. The participant is generally accepted for assessment, but may not be accepted for placement or training services due to various reasons. If not accepted for placement or training services,

appropriate recommendations will be made and the client will be informed of such recommendations.

- If a client who is disabled or has a disability contacts Goodwill Industries for services, but is not affiliated with LRS, he/she will be advised to refer his/herself for services.
- Referral that includes an assessment from another agency will be considered for placement services following complete review of referral information and assessment. The assessment must be recent, within a year of the date of the referral. The client (and family members at times) will be asked to attend a staffing (meeting with a Workforce Development counselor and/or staff member) at Goodwill Industries to discuss employment goals. Following this meeting the Goodwill Industries staff will determine if the client will be accepted for placement services.

Entry Test for Adult Basic Education (TABE)

First-time applicants entering Goodwill Technical School must take the TABE Test. Applicants are required to score at least a six grade reading, vocabulary, and math level.

PROOF OF IMMUNIZATION POLICY AND PROCEDURES

As required by Louisiana R.S. 17:170, (as mandated by Act 10147 of 1990) effective January 1, 1991, Schools of Higher Learning, and as a condition of enrollment, all Goodwill Industries of Southeastern Louisiana, Inc. Training School applicants born after 1956 must show proof of immunization by providing two separate dates of the MMR (Measles, Mumps, and, Rubella) vaccination and one date of the tetanus-diphtheria vaccination within the last 10 years. In addition, ALL beginning applicants must provide proof of immunization against meningococcal meningitis. Forms to be completed by the student's physician or other health care provider are available in the Admissions Packet.

ATTENDANCE POLICY

Attendance Policy

The student should not accumulate more than five (5) days of being absent during the course of the class. If there are circumstances that require you to miss more than the allotted five (5) days, please speak with the instructor and counselor immediately.

Late Policy

The student should not accumulate more than five (5) days of being tardy during the course of the class. A reduction in grade could occur as a result of excessive tardiness.

COMPLETION POLICY AND PROCEDURES

Goodwill Technical College Certified Training programs ensures the value and effectiveness of their course(s) and program(s) by regularly assessing, documenting, and validating the quality of the training services provided through completion rates, student/graduate satisfaction, and job placement rates. Credible completion and placement rates serve the students' best interests and, in turn, enhance public confidence in our accredited programs and the accreditation process.

Policy Requirements:

- All training programs will provide job placement assistance to all eligible students/graduates.
- Completion records will be maintained in an orderly, comprehensive, and accurate manner for all students and must be verifiable.
- The completion data must include sufficient information for regularly calculating the percentage for completion and training-related job placements in a prescribed format and time frame.
- An evaluation of each program will be performed to determine participant satisfaction.
- Solicit feedback from business advisory board and employers. The business advisory board will provide guidance and recommendations to the training programs. Employers will evaluate and report to the school the student/employee's performance up to 90 days.
- Solicit feedback from students/graduates by having students to complete evaluation on instructors and programs.

Procedures:

In order to communicate the requirements, conditions, and results in terms of completion data must be collected, documented, and analyzed regularly. Performing these procedures will demonstrate clear and positive outcomes from the training

- For the purpose of documenting and reporting, all completion data on each student should be entered into a database
- Database should be maintained per semester and/or when necessary. If a student becomes employed prior to completion of training, student placement information should be documented immediately. Do not wait until the end of semester or quarter to document student placement activity.
- Completion statistics should be updated and ready for submission upon request by ASR, SCORECARD, VA, and WFD reporting systems.

Completion Activity - is tracked by all program requirements met to include assignments, exams, certification and any activity mandatory to graduate, graduation dates.

GENERAL SAFETY PROCEDURES

The following general safety procedures should be followed:

- Learn the locations of emergency exits, evacuation routes and fire extinguishers.
- Do not block fire doors, exits, or aisles.
- Report any accident or injury to Goodwill staff immediately.
- No Weapons (this includes pocket knives).
- No horseplay.
- Use safety equipment when needed.
- Do not use elevators when there is an emergency.
- In an emergency, if you are unable to exit building on your own ask for help.
- If the fire alarm goes off, exit the building calmly following Goodwill's staff.
- Listen to Goodwill staff during an emergency situation.
- No children are allowed at orientation, assessment times, soft skills, site visits or during training.

GRADING POLICY

The grading policy used by the school for academic achievement is as follows:

A - Excellent	90 - 100
B - Above Average	80 - 89
C - Average	70 - 79
D - Below Average	60 - 69
F - Failing	59 and Below

Participants with a grade point average of less than 70% will be given the opportunity to make up their work. If they cannot meet the minimum standards within 2 weeks, they can be terminated from the program.

Participants terminated for academic failure can be readmitted to the class at the discretion of the Vice President of Workforce Development and Institutional Advancement.

Participants who satisfactorily complete the skills program and meet graduation requirements will be issued certificates of completion.

Satisfactory Progress

A participant must make sufficient progress to continue in any of the training programs. Progress will be evaluated monthly and the student will receive notification of his/her progress.

Previous Credit

Participants will be evaluated upon acceptance into the school to determine which program is most appropriate in consideration of their past schooling and work experience.

JOB PLACEMENT POLICY AND PROCEDURES

As established in the Completion policy and procedure document, the requirements are to be considered the job placement projection rate of our students. Goodwill Technical College Training Program's goal is to train, certify, and prepare our students for the workplace in a credible skill that will afford them the opportunity to obtain employment in areas where acquired certification is needed.

- All training programs will provide job placement assistance to all eligible students/graduates.
- Placement records will be maintained in an orderly, comprehensive, and accurate manner for all students and must be verifiable.
- The placement data must include sufficient information for regularly calculating the percentage for completion and training-related job placements in a prescribed format and time frame.
- An evaluation of each program will be performed to determine participant satisfaction.
- Solicit feedback from advisory board and employers. The advisory board will provide guidance and recommendations to the college. Employers will evaluate and report to the school the student/employee's performance up to 90 days.
- Solicit feedback from students/graduates by having students to complete evaluation on instructors and programs.

Job Placement Activity - is tracked by all program requirements met to include assignments, exams, certification, any activity mandatory to graduate, and graduation date. Student can also become employed and continue training pursuing certification(s).

The minimum information required includes the following:

- a. Name of student
- b. Completion date
- c. Program name
- a. Employer information:
 1. Employment start date
 2. Job title and Job description
 3. Name of employer, mailing address, telephone number and email address
 4. Employer contact person
- d. Documentation of self-employment, temporary employment, full/part-time employment, or continuing employment

Unavailable for Employment – If employment is offered to student and student chooses not to accept employment, he/she is required to provide an explanation for why they declined position.

Employment Follow-up – Job Developers, instructors, and Retention Specialist are to complete 30 day follow-ups (up to 90 days) on students placed in jobs. Some students may require a longer follow-up period. If so, use your discretion to determine if additional time is necessary. Upon completion of the 90 day evaluation case managers and instructors are not responsible to continue follow-up, but can do so at the interest of the student.

REFUND POLICY

Three Business days Cancellation Policy:

If a student withdraws 3 days prior to the start of classes, all tuition and fees will be refundable 100%. Refunds will be made available to student within 30 business days.

After 3 business day cancellation period but before commencement of classes by the student:

Tuition and fees collected advance of entrance and if the student does not begin classes, not more than \$25.00 shall be retained by Goodwill Industries. Refunds for a student who does not begin classes shall be made within 30 days of the start of a quarter, term or semester.

Withdrawal and Refund Policy after the start of classes:

1. After a student has completed less than 15% of the courses, Goodwill Industries shall refund at least 80% of the tuition, excluding any registration fees;
2. After a student has completed less than one-fourth of the course, Goodwill Industries will refund at least 70% of tuition, excluding any registration fees;
3. After a student has completed one-fourth but less than half of the course, the institution shall refund at least 45% of tuition, excluding any registration fees;
4. After a student has completed one-half or more of the course, Goodwill Industries will retain 100% of the state course price.

STUDENT DRESS CODE POLICY

Students' dress at Goodwill Technical College should reflect high standards of personal self - image so that each student may share in promoting a positive, healthy and safe atmosphere within the community. The dress code is limited in time and place to educational facilities, including classrooms, the hallways and the surrounding environment.

The continuous demonstration of appropriate manners and dress insures that students meet the very minimum standards of quality achievement in the social, physical, moral and educational aspects of their lives - essential areas of development necessary for driving students toward successful careers. Understanding and employing these behaviors not only improves the quality of one's life, but also contributes to optimum morale, as well as embellishes the overall school image. They also play a major role in instilling a sense of integrity and an appreciation for values and ethics.

Students are expected to follow Goodwill Technical College's *Dress Code* guidelines.

Examples of Inappropriate Dress and/or Appearance for FEMALES

1. Do-rags, stocking caps, skullcaps and bandanas prohibited upon entering School's building
2. Head coverings and hoods for men in any building.
3. Baseball caps and hoods for women in any building. This policy item does not apply to headgear considered as a part of religious or cultural dress.
4. Clothing which allows undergarments to be visually observed is not permitted
5. Clothing with derogatory, offensive and/or lewd messages either in words or pictures.
6. Sagging pants is prohibited

7. Shirts/tops must be worn at all times while in public or common areas of the School. Sports bras, and undergarments must be covered
8. Midriffs or halters, mesh or netted shirts, tube tops, cut-off t-shirts, or “wife beaters” are not permitted
9. Pajamas, stocking caps, hair wraps, hair rollers and bedroom slippers shall not be worn while in public or in common areas
10. Dresses, skirts or pants which are slit more than six inches above the knee are not permitted
11. Short shorts or skirts that reveal buttocks are not permitted
12. All students must wear shoes, boots, or other types of footwear at all times. Bare feet prohibited.

Examples of Inappropriate Dress and/or Appearance for MALES

1. Do-rags, stocking caps, skullcaps and bandanas prohibited upon entering School’s building
2. Baseball caps, hoods or other head coverings are not to be worn in buildings (All head coverings must be removed when entering building)
3. Clothing which allows undergarments to be visually observed is not permitted
4. Sagging or unbelted pants is prohibited
5. Shirts must be worn at all times while in public or common areas of the College
6. Netted shirts, cut-off t-shirts, or “wife beaters” are not permitted
7. Attire must not display obscene, profane, lewd, illegal or offensive images or words
8. Pajamas, stocking caps, and bedroom slippers shall not be worn while in of the College
9. Clothing associated with women’s garb (dresses, skirts, short shorts, blouses purses, pumps, etc., is prohibited

Examples of Appropriate Dress and/or Appearance for FEMALES

1. Classroom, Hallways, School Building and Offices – neat, modest, casual or dressy attire
2. Formal programs in the Campus Center, Little Theater
3. Career Placement Activities/Interviews – business attire
4. Classrooms – modest, casual

All administrative, faculty and support staff members will be expected to monitor student behavior applicable to this dress code and report any such disregard or violations to the Director of College Academics.

STUDENT GRIEVANCES POLICY AND PROCEDURES

Goodwill Technical College wishes to afford every student the opportunity to have his/her grievances heard and resolved, if possible. The resolution of an individual grievance can help to improve Goodwill Technical College’s facility, program, policy, and services. All members of Goodwill Technical College have the right to file a grievance without being reprimanded or disciplined in any way, unless the grievance is filed for malicious reasons.

A student shall notify the immediate supervisor or rehabilitation counselor of his/her grievance. The supervisor, instructor or rehabilitation counselor will have the student complete a “Student Complaint Form.” That form will be given to the Vice President of Workforce Development and Institutional Advancement. The Vice President of Workforce Development and Institutional Advancement will arrange for a meeting with the client. If the supervisor or counselor cannot

reach a solution, the grievance will be directed to the Vice President of Workforce Development and Institutional Advancement. The Vice President of Workforce Development and Institutional Advancement will meet with the parties involved and document the situation and if unable to reach a solution, the matter will be referred to the President. This process must be completed in an expeditious manner to allow for prompt corrective action when called for.

If an agency funding participants has other requirements, Goodwill Technical College staff will adhere to these too.

Student complaints relative to actions of school officials shall be addressed to the Louisiana Board of Regents, Proprietary Schools Section, P.O. Box 3677, Baton Rouge, LA 70821-3677, Phone (225) 342-7084, only after the student has unsuccessfully attempted to resolve the matter with the school after having first filed a written and signed complaint with the school's officials.

TRANSCRIPT POLICY

PRIVACY: Student records are confidential, and Transcripts are issued only at the written request of the student. Telephone requests are not accepted.

TRANSCRIPTS ISSUED TO STUDENT: A Transcript is a complete copy of the student's academic record. Official Transcripts bear the College seal and the signature of the Instructor, Director of College Academics, and Vice President of Workforce Development and Institutional Advancement. If a Transcript is sent directly to a student, the words '**Issued to Student**' will appear on the Transcript.

TRANSCRIPTS TO AND FROM OTHER SCHOOLS: Goodwill Technical College Certified Training Programs is unable to release transcripts received from other educational institutions. Goodwill Technical College Certified Training Programs can only issue transcripts from this institution to other schools/agencies at the request of the student.

REQUEST IN PERSON: Students and former students are welcome to visit the office and complete the transcript request form for an electronic transcript. Depending on the number of pending requests, paper transcripts can be processed while you wait. Please note, however, that if the number of transcripts pending is high or if transcript verification must be completed (for older student records), it may be 24 hours or more before a transcript is ready. If more than 10 transcripts are needed, the requestor should allow five business days for processing.

REQUEST BY EMAIL/ELECTRONIC: Goodwill Technical College Certified Training Programs sends Unofficial Transcripts electronically by email upon student request when Transcript Request form is completed and signed by student. Please read (Physical Signature required below). An organization may receive transcript electronically upon verification of company/business email address.

REQUEST BY FAX: Requests to have transcripts sent by fax after third free copy requires a \$10.00 pre-payment fee per transcript. Transcripts sent by fax are considered *unofficial*; therefore individuals should print and then fax their own Unofficial Transcripts.

PHYSICAL SIGNATURE REQUIRED: All requests must be printed and physically signed (student signatures required) and returned to the Registrar's office in person or via fax, mail, or emailed as a *signed/scanned PDF*. Please note that we do not accept electronic or "mouse" signatures or stamps, and we do not accept links to documents.

TRANSCRIPT COSTS: You can request up to 3 free copies of Transcripts. A payment of \$10.00 per Transcript is required after third copy. Transcripts cannot be provided if you have a financial hold with the college. **Note: If paying with credit card any, *declined credit cards and unpaid Transcript requests will be deleted within one week of receipt of request.**

Requests and Payments should be made to:

Goodwill Technical College

Request of Transcript

2470 Canal Street

New Orleans, LA 70119

Please do not send cash through the mail.

Definitions of Transcript

Official Transcripts

Official Transcripts often bear a security watermark in the paper on which the transcript is printed or a College seal. It also, bears the signature of the Director of College Academics, Counselor, or registrar who certifies the document. When employers require an Official Transcript, it must be requested by the student or alumnus and sent directly from the high school or college to the Human Resources Office. High school students/graduates should contact the Guidance Office and college students/graduates should contact the Registrar's Office to have an official Transcript sent.

Unofficial Transcripts

If an unofficial Transcript is requested, it is acceptable to send a photocopy, faxed copy, or a downloaded copy of a Transcript as long as the copy is legible and contains the required information.

Each unofficial Transcript must document:

- ✓ Identification of the student
- ✓ Identification of the institution
- ✓ Titles of courses and examinations you completed
- ✓ Grades (marks) you received
- ✓ Credit, hours, or units earned
- ✓ Any diploma, certificate, or degree you received
- ✓ Date that the diploma, certificate, or degree was conferred

Physical Signature

*Student handwritten signature must be on the request form along with date of request. Electronic or mouse signatures are **not accepted**.*

PROGRAM DESCRIPTIONS

BROADBAND TECHNOLOGY TECHNICIAN

450 Hours | 22 Weeks

Description: This training acquaints the student with the fundamental background and knowledge used in businesses and Smart Homes. Each training module boasts a unique curriculum designed to prepare for a professional future by providing the information base and skill set desired by employers in electrical, data, telephone, cable TV, computer networking industries and more. Minimum entry requirements: Score 6th grade or above on TABE. Class size – Maximum 20

Course Objective: The primary training goal is to prepare students for entry-level, hands-on employment in environments where they can utilize their training in the installation of video, voice and data systems and gain further training within those environments. Our students are trained and certified in the following areas:

- Introduction to Telecommunications
- Copper-Based Network Cabling
- Fiber Optics

C-Tech courses are taught by a certified C-Tech instructor utilizing proprietary C-Tech curriculum, ACT panels and DAVE 3 kits.

Skills Overview:

- Construct, test and troubleshoot 4 pair twisted cabling systems
- Identify, terminate and test coaxial cabling systems used in networking and telecommunication with understanding of applications
- Identify and describe the characteristics, application and configurations of the various twisted pair cabling systems derived by industry standards
- Safety precautions relative to personal protection, workplace safety, and other hazards found in the workplace/jobsite

Evaluative Methods Employed:

- Anticipate and record responses for open, short, reversal, transposal, transposal with reversal, split pair and dual lighting
- Define common coaxial cabling applications in regards to cable television systems, cable modems, digital satellite systems and Local Area Networks (LAN)
- Terminate and test RG 59 coaxial cable systems using F type connectors and BNC connectors, terminate F type and BNC connectors using quad shield coaxial cables
- Identify and explain safety procedures to be followed for personal protection, worksite/jobsite safety, and fire prevention safety

To learn more about the C-Tech Program's design and curriculum, please visit:

<http://www.c-techtraining.com/index.htm>

Upon completion of this training, students are eligible to take the national certification exam administered through The National Broadband Academy. In addition, students will receive a certificate of completion from Goodwill Industries of Southeastern Louisiana, Inc.

Requirements for graduation: Meet all attendance requirements and pass all National Certification exams.

Course Descriptions:

BROB 101 Introduction to Telecommunications | (20 Lec/25 Lab=45 Hours)

Introduction to Telecommunications is designed to have students become familiar with computers and its usage with technology. Students will learn the fundamentals of the desktop environment, keyboarding and mouse operations, navigate around the Internet, safety and security practices, selecting appropriate Internet browsers, creating and using email accounts, and basics of Microsoft Word application. Coursework includes a hands-on approach where students can explore the issues related to computers and technology.

This introductory course acquaints the student with the fundamental background knowledge in the theory, mediums of transmissions, topologies and functions of systems used in businesses and Smart Homes.

BMAT 101 Basic Math Refresher | (15 Lec/30 Lab=45 Hours)

This course is designed for students who have successfully completed high school math and need to refresh their skills with a review of measurements, algebra, geometry, trigonometry, graphs, and finance. These are presented at an introductory level and the emphasis is on applications. The math problems encountered in the real world tend to be messy problems for which textbook approaches are very tedious or simply won't work. During this course, in addition to the standard textbook techniques, we will show you how to leverage technology to solve the more general problems you may encounter in real world applications.

BMGT 101 Introduction to Entrepreneurship | (45 Lec/0 Lab=45 Hours)

This course provides students with an introduction to the potential and pitfalls of Entrepreneurship. Students will learn about the various methods for starting up, managing and financing a new venture. Students will get a chance to evaluate real world business plans and videos of entrepreneurs.

ACCT 101 Introduction to Bookkeeping | (25 Lec/20 Lab=45 Hours)

This course covers the fundamentals of accounting with the newcomer in mind. This course assumes students have no prior knowledge about accounting or finance and delivers lessons and examples to build accounting skills. Specifically, this class addresses accounting terminology, revenue, expenses, net income, the accounting equation, debits, credits, and balancing the accounting formula, the accounting structure, the accounting cycle, journals, ledgers, the trial balance and more. It also guides students to learn how to read financial statements properly, and how to grab meaningful information from the balance sheet, income statements and cash flow statements.

BMGT 105 Business Communications | (20 Lec/25 Lab=45 Hours)

Introduces the student to a variety of technical and business writing theories and practices designed to be applicable to the production of business communication in the real world. It teaches the fundamentals of good business writing, including protocols for business letters, memoranda, electronic mail, good and bad messages, persuasive messages and formal reports and proposals. In addition, there will be instruction in oral presentation and in-depth practice on both an individual and a collaborative basis. Students will learn how to enhance their business communication with technically based media.

BROB 201 Network Specialist- Copper | (15 Lec/30 Lab/45 Hours)

This course acquaints the student with the fundamental background knowledge in the theory, mediums of transmissions, topologies and functions of systems used in businesses and Smart Homes.

BROB 202 Network Specialist- Fiber Optics | (15 Lec/30 Lab/45 Hours)

This course is designed to provide students with the knowledge and skills necessary to become entry level technicians in the Network Cabling industry. The focus of the course is on the following: tool use and construction techniques; the characteristics of various industry standards; troubleshooting and repairs.

Prerequisite: Student must complete BROB-201 or be concurrently enrolled. Failure to comply will result in the student being dropped from the class.

BROB 301 Introduction to Home Entertainment Residential Audio/Video Systems | (5 Lec/25 Lab/30 Hours)

This course is designed to provide students with the basics in Audio and Video entertainment system theory of operation, installation and troubleshooting; skills necessary to secure positions as “Entry-level Home Entertainment Installation Technicians.”

BROB 401 Introduction to Telephone Systems and VoIP | (15Lec/30Lab/45 Hours)

This course provides students with both a theoretical and hands-on knowledge of Key Telephone Systems, Voice Mail, and VoIP systems. Students are taught to install, program, maintain, and upgrade the systems.

BROB 501 Introduction to Energy Management Systems | (10 Lec/20 Lab/30 Hours)

This course provides the student with the skill sets that include identifying how proactive and passive energy management systems reduce expense and environmental impact while increasing efficiency and comfort in residential or commercial settings.

JOBS 100 Job Seeking Skills| (15 Lec/15 Lab=30 Hours)

This course is designed to teach students the employability skills needed to succeed in the workplace. The focus of this course is to teach students transferable skills necessary to succeed in the ever-changing workplace through teamwork, problem-solving, communication, self-management, and career readiness. Students will enhance basic soft skills, workplace skills, interpersonal skills, communication skills, and leadership skills while becoming career-ready.

COMPUTER TRAINING PROGRAMS

Microsoft Office Technology

450 Hours | 22 Weeks

Description: This course is designed to teach students computer basics including Windows, Microsoft Office Business Applications, and Internet Skills. Students will also learn basic office and keyboarding skills. Practice exams are administered throughout the course. Upon completion of this program the student will have an opportunity to earn three Microsoft certifications (Excel, PowerPoint, and Word). Minimum entry requirements: Score 6th grade or above on TABE entry exam.

Objective: Student will be able to use the Microsoft Office Suite software effectively and proficiently.

Participants will learn keyboarding practice, mouse operations and Windows OS, sharing and maintaining documents, formatting content, applying page layout and reusable content, including illustrations and graphics in a document, proofreading documents, applying references and hyperlinks, performing mail merge operations, managing the worksheet environment, creating cell data, formatting cells and worksheets, managing worksheets and workbooks, applying formulas and functions, presenting data visually, sharing worksheet data with other users, analyzing and organizing data, managing the PowerPoint environment, creating a slide presentation, working with graphical and multimedia elements, creating charts and tables, applying transitions and animations, collaborating on presentations, preparing presentations for delivery and delivering presentations. (Class Size: Maximum: 15)

Requirements for graduation: Meet all attendance requirements and successfully earn 85% or higher in all training modules prior to taking certification exams. To receive the MOS certification, student must take at least one exam and must score 80% or above on each exam. One retake of each exam is offered by Certiport.

Course Descriptions:

CLIT 001-Introduction to Computer Literacy | (15 Lec/15 Lab=30 Hours)

Introduction to Computer Literacy is designed to have students become familiar with computers and its usage with technology. Students will learn the fundamentals of the desktop environment, keyboarding and mouse operations, navigate around the Internet, safety and security practices, selecting appropriate Internet browsers, creating and using email accounts, and basics of Microsoft Word application. Coursework includes a hands-on approach where students can explore the issues related to computers and technology.

KEYB 101-Keyboarding and Mouse Skills | (10 Lec/20 Lab=30 Hours)

This course is designed to teach Keyboarding and Mouse skills. The student will become familiar with the five types of keys on a keyboard (typing, function, cursor, numeric and program computer keys). This course will discuss and teach the student the five mouse operations (point, single click, double click, click and drag, and right click) and how to properly handle the mouse. While learning mouse operation, the student will learn to navigate Windows Desktop.

BMGT 101 Introduction to Entrepreneurship | (45 Lec/0 Lab=45 Hours)

This course provides students with an introduction to the potential and pitfalls of Entrepreneurship. Students will learn about the various methods for starting up, managing and financing a new venture. Students will get a chance to evaluate real world business plans and videos of entrepreneurs.

BMAT 101 Basic Math Refresher | (15 Lec/30 Lab=45 Hours)

This course is designed for students who have successfully completed high school math and need to refresh their skills with a review of measurements, algebra, geometry, trigonometry, graphs, and finance. These are presented at an introductory level and the emphasis is on applications. The math problems encountered in the real world tend to be messy problems for which textbook approaches are very tedious or simply won't work. During this course, in addition to the standard textbook techniques, we will show you how to leverage technology to solve the more general problems you may encounter in real world applications.

ACCT 101 Introduction to Bookkeeping | (25 Lec/20 Lab=45 Hours)

This course covers the fundamentals of accounting with the newcomer in mind. This course assumes students have no prior knowledge about accounting or finance and delivers lessons and examples to build accounting skills. Specifically, this class addresses accounting terminology,

revenue, expenses, net income, the accounting equation, debits, credits, and balancing the accounting formula, the accounting structure, the accounting cycle, journals, ledgers, the trial balance and more. It also guides students to learn how to read financial statements properly, and how to grab meaningful information from the balance sheet, income statements and cash flow statements.

MOWC 101-Microsoft Office Word | (15 Lec/30 Lab=45 Hours)

Microsoft Office Word is designed to teach students Word skills used in daily administrative office duties. The student will also learn how to prepare for Microsoft Word Certification exam 77-881.

MOEC 101-Microsoft Office Excel | (15Lec/30Lab/45 Hours)

Microsoft Office Excel is designed to teach students Excel skills used in daily administrative office duties. The students will learn to create worksheets and workbooks to save, perform calculations, manipulate, and share data. The student will also learn how to prepare for Microsoft Excel Certification exam 77-882.

MOPC 101-Microsoft Office PowerPoint | (15Lec/30Lab/45 Hours)

Microsoft Office PowerPoint course is designed to teach students basic PowerPoint skills to effectively communicate information through visual and multimedia tools. The student will also learn how to prepare for Microsoft PowerPoint Certification exam 77-883.

OSSC 101-Office Skills Simulations | (20 Lec/25 Lab/45 Hours)

This course is designed to teach the student office management talents. The student will learn how to prioritize and organize daily activities. The student will play the role of Office Manager and/or Administrative Assistant. He/she will be required to manage the office and complete all tasks by applying skills from preceding modules. The students will conduct themselves in a professional manner.

BMGT 105 Business Communications | (20 Lec/25 Lab=45 Hours)

Introduces the student to a variety of technical and business writing theories and practices designed to be applicable to the production of business communication in the real world. It teaches the fundamentals of good business writing, including protocols for business letters, memoranda, electronic mail, good and bad messages, persuasive messages and formal reports and proposals. In addition, there will be instruction in oral presentation and in-depth practice on both an individual and a collaborative basis. Students will learn how to enhance their business communication with technically based media.

JOBS 100 Job Seeking Skills | (15 Lec/15 Lab=30 Hours)

This course is designed to teach students the employability skills needed to succeed in the workplace. The focus of this course is to teach students transferable skills necessary to succeed in the ever-changing workplace through teamwork, problem-solving, communication, self-management, and career readiness. Students will enhance basic soft skills, workplace skills, interpersonal skills, communication skills, and leadership skills while becoming career-ready.

Medical Billing and Coding

495 Hours | 22 Weeks

Description: This course is designed to teach the students fundamental skills to be able to work in the dynamic environment of health care. It assures a broad knowledge of all components to work successfully in a wide variety of health care settings covering, electronic health records, coding, billing, and insurance claims. Students will gain a vast knowledge of medical terminology and the anatomy of the human body. The students will also gain computer and software skills related to the health care environment. The students will learn to communicate effectively with patience and co-workers. Minimum entry requirements: Score 6th grade or above on TABE. Class Size: 10 – 15 students per class

Requirements for graduation: Meet all attendance requirements and successfully earn 80% or higher in all training courses prior to taking certification exams.

Course Objective: Upon completion of the Medical Billing and Coding program the students will have the knowledge and skills required to complete medical billing and coding tasks in a hospital, medical office, and/or other health care facilities. Students will become familiar with medical terminology, and anatomy and physiology. The student will become knowledgeable of ICD-10-CM diagnostic coding, CPT and HCPCS procedural coding, medical insurance, electronic and paper billing, reimbursements, refunds, claim follow up and payment procedures. The students will have the knowledge to handle all stages of billing functions, understand coding and billing compliance, and health care laws and ethics. The students will also become skillful in computer operations and medical related software. The Medical Billing and Coding program prepare students to take the Coding Specialist (CBCS) exam offered by the National Health Career Association (NHA), with the potential to earn the Certified Medical Billing and Coding Specialist (CBCS) credential.

BMGT 101 Introduction to Entrepreneurship | (45 Lec/0 Lab=45 Hours)

This course provides students with an introduction to the potential and pitfalls of Entrepreneurship. Students will learn about the various methods for starting up, managing and financing a new venture. Students will get a chance to evaluate real world business plans and videos of entrepreneurs.

BMAT 101 Basic Math Refresher | (15 Lec/30 Lab=45 Hours)

This course is designed for students who have successfully completed high school math and need to refresh their skills with a review of measurements, algebra, geometry, trigonometry, graphs, and finance. These are presented at an introductory level and the emphasis is on applications. The math problems encountered in the real world tend to be messy problems for which textbook approaches are very tedious or simply won't work. During this course, in addition to the standard textbook techniques, we will show you how to leverage technology to solve more general problems you may encounter in real world applications.

ACCT 101 Introduction to Bookkeeping | (25 Lec/20 Lab=45 Hours)

This course covers the fundamentals of accounting with the newcomer in mind. This course assumes students have no prior knowledge about accounting or finance and delivers lessons and examples to build accounting skills. Specifically, this class addresses accounting terminology, revenue, expenses, net income, the accounting equation, debits, credits, and balancing the accounting formula, the accounting structure, the accounting cycle, journals, ledgers, the trial balance and more. It also guides students to learn how to read financial statements properly, and how to grab meaningful information from the balance sheet, income statements and cash flow statements.

HCA101 Introduction to Health Care | (45 Lec/0 Lab=45 Hours)

This course will provide a broad overview of the U.S. health care system. The historical evolution of the business of health care is examined. The student will also explore concepts and work force opportunities in the health care industry.

This course is designed to introduce the student to medical terminology used in health care today. This course will focus on terminology, word formations, and acronyms. After completing the course, the student should be able to read and evaluate clinical information in order to operate effectively to perform medical billing, coding, information management, and administrative functions in a medical office or facility setting.

This course will provide an overview of the structure and functions of the human body. The student will be introduced to different systems of the human body and how they function to keep the body operating at normal capacity. This course will also introduce some common disorders seen regularly to help acclimate students' various conditions and disorders that impact the body.

MBC 101 Introduction to ICD-10 Coding Principles and Applications | (40 Lec/20 Lab=60 Hours)

This course is designed to introduce the ICD-10 system for assigning ICD-10 codes to provide official coding guidelines will be presented to help students learn to assign ICD-10 codes.

This course is designed to introduce CPT coding for medical office and hospital applications. Students will learn to correctly assign CPT and HCPCS codes to patient services in a medical office, facility, and other health settings. There will also be a focus on code linkage and coding compliance to ensure ethical coding is learned and practiced.

HCA 102 Medical Law and Ethics and Health Records | (40 Lec/20 Lab=60 Hours)

This Medical Law and Ethics course will introduce you to legal and ethical issues related to the health care setting. This course provides an overview of the laws and professional requirements that regulate the delivery of health care, including HIPAA, the Patient's Bill of Rights, and standard of care. You will also learn about some of the ethical and moral issues that health care professionals may encounter.

This health records course will introduce the structure and functions of health records. This course will help prepare you to collect, maintain, and analyze health information including history, symptoms, examinations, results, diagnosis suggestions, and treatment suggestions. The focus will be on record accuracy, quality, and accessibility of health information.

MBC 201- Introduction to Professional and Institutional Billing | (20 Lec/25 Lab=45Hours)

Modifiers play an important role in the overall coding, billing, and reimbursement process. They help to provide additional information about the services provided. This course will focus on introducing CPT and HCPCS modifiers and their use. The course will cover how to use modifiers, and will also introduce resources available through the Centers for Medicare and Medicaid Services that are used on a regular basis to make modifier selections.

This course was designed to introduce professional and institutional billing. The course will outline all components required for billing on the CMS-1500 claim form, and the UB-04 claim form. In this course we will learn billing processes and guidelines for multiple types of providers, and payers. The course will focus on billing to Medicare, Medicaid, Veterans Administration, and commercial insurance payers. The goal is to learn the processes and

compliance guidelines necessary to submit a clean professional and institutional claim.

Coding and billing compliance guidelines will be introduced in this course. The class will focus on the importance of a good compliance program to prevent fraud and abuse in health care. To meet this end goal, we will examine billing and compliance regulations, and we will look at specific cases of fraud and abuse to allow students to what billing and coding fraud and abuse looks like. The significance of accuracy, ethics, and continuing education will be emphasized throughout the course.

MBC 202-Health Care Finance Managing Accounts Receivables | (20 Lec/10 Lab=30Hours)

This course will provide a comprehensive overview of health care financial management. The course will emphasize the development of practical financial analysis that will provide a good foundation for understanding financial stability. We will cover processes that impact health care finance from initial billing through receivable management.

MBC 203-Introduction to Electronic Claims Filing | (20 Lec/25 Lab=45 Hours)

It is essential for students to be able to read and interpret clearinghouse rejection and acceptance reports. Managing claim rejections and denials is very important for maintaining financial stability. In this course students will learn how to read clearinghouse reports, and how to look for and identify problems on claims so that they can be corrected for resubmission. This course will also focus on identifying the reason for claim denials, and how to get a denial overturned. Students will also learn the different types and levels of appeals.

This course will introduce the claim adjudication process for electronic and paper claims. Students will learn the components needed for claim adjudication for Medicare, Medicaid, Veterans Administration, and commercial payers. We will also cover the lifecycle of a claim when starting from the point it is billed through payment receipt. This course will help students develop an understanding of what components are needed to bill a clean claim to different payers.

This course will examine ERA's/EOP's to help students develop an understanding of how to read and interpret payment information received from insurance payers. This course will also cover the dynamics between fee schedules, and contractual arrangements with a focus on understanding the rate of payment for charges. Students will learn how to post a payment, complete contractual adjustments, and bill residual balances when needed to the patient.

MBC 204-Physician-Based Chart Auditing | (10 Lec/5 Lab=15 Hours)

Chart audits play a very vital role in ensuring compliance and accuracy. In this course basic chart audit techniques will be introduced allowing the students to develop a basic understanding of how to complete a chart audit. The course will also focus on finding missed payment potential, and compliance error prevention by continuous chart audits.

JOBS 100 Job Seeking Skills | (15 Lec/15 Lab=30 Hours)

This course is designed to teach students the employability skills needed to succeed in the workplace. The focus of this course is to teach students transferable skills necessary to succeed in the ever-changing workplace through teamwork, problem-solving, communication, self-management, and career readiness. Students will enhance basic soft skills, workplace skills, interpersonal skills, communication skills, and leadership skills while becoming career-ready.

Medical Office Administrative Assistant
495 Hours | 22 Weeks

Description: This course is designed to teach the students fundamental skills to be able to work in the dynamic environment of health care. It assures a broad knowledge of all components to work successfully in a wide variety of health care settings covering intake and scheduling procedures, managing medical records, coding principles, billing procedures, and claim follow up; and managing correspondences and supplies. Students will gain a vast knowledge of medical terminology and the anatomy of the human body. Students will also learn computer skills necessary for a health care environment, communication, and patience activity.

Class Size: 10 – 15 students per class

Requirements for graduation: Meet all attendance requirements and successfully earn 80% or higher in all training courses prior to taking certification exams.

Course Objective: Upon completion of the Medical Office Administrative Assistant program the student will have the knowledge and skills required for work performing administrative tasks in a medical office, facility, or other medical settings. Students learn how to schedule appointments, maintain patient records, perform billing and coding duties, and preparation of general patient and office correspondence. Graduates of this program will be prepared to take the Certified Medical Administrative Assistant (CMAA) exam offered by the National Health Career Association (NHA), with the potential to earn the Certified Medical Administrative Assistant (CMAA) credential.

work force opportunities in the health care industry

JOBS 100 Job Seeking Skills | (15 Lec/15 Lab=30 Hours)

This course is designed to teach students the employability skills needed to succeed in the workplace. The focus of this course is to teach students transferable skills necessary to succeed in the ever-changing workplace through teamwork, problem-solving, communication, self-management, and career readiness. Students will enhance basic soft skills, workplace skills, interpersonal skills, communication skills, and leadership skills while becoming career-ready.

START (HOSPITALITY, CUSTOMER SERVICES and SALES)

510 Hours | 22 Weeks

Description: This course is divided into two sections: The Skills, Tasks and Result Training (START) program is designed to teach students the skills in the Hospitality industry. It introduces them to the rooms division and food and beverage industry as well as provides opportunities to demonstrate business etiquette and professionalism. The START Program, developed by the American Hotel and Lodging Educational Institute (AHLEI), is a curriculum that gives students and people re-entering the work force the real-world knowledge and skills needed for a long-term career in the lodging industry. Minimum entry requirements: Score 6th grade or above on TABE entry exam.

Customer Service/Sales Fundamentals and Hospitality. The Customer Service and Sales Fundamentals section is designed to teach students the concepts of delivering professional customer service skills, and provide basic sales tasks. Students are presented with simple scenarios where they are to use good judgement to determine the best course of action.

Course Objective: Participants will learn an introduction to the world of hospitality and tourism along with twelve entry-level positions in the world of hospitality which include: Reservationist, Bell Services Attendant, Maintenance Worker, Public Space Cleaner, Front Desk Representative, PBX Operator, Guestroom Attendant, Laundry Attendant, Restaurant Server, Banquet Set-Up Employee, Banquet Server, and Bus Person. The textbook information, skills, and hands-on activities will provide START Students to gain real-world skills that are transferable and portable. (Class size – Maximum 20)

Upon completion of this training, students are eligible to take the national certification exam administered through The American Hotel and Lodging Educational Institute. In addition, students will receive a certificate of completion from Goodwill Industries of Southeastern Louisiana, Inc.

Requirements for graduation: Meet all attendance requirements and achieve a 70%/C or higher on all combined graded work.

Course Descriptions

CLIT 001 Introduction to Computer Literacy | (15 Lec/15 Lab=30 Hours)

Introduction to Computer Literacy is designed to have students become familiar with computers and its usage with technology. Students will learn the fundamentals of the desktop environment, keyboarding and mouse operations, navigate around the Internet, safety and security practices, selecting appropriate Internet browsers, creating and using email accounts, and basics of Microsoft Word application. Coursework includes a hands-on approach where students can explore the issues related to computers and technology.

KEYB 101-Keyboarding and Mouse Skills | (10 Lec/20 Lab=30 Hours)

This course is designed to teach Keyboarding and Mouse skills. The student will become familiar with the five types of keys on a keyboard (typing, function, cursor, numeric and program computer keys). This course will discuss and teach the student the five mouse operations (point, single click, double click, click and drag, and right click) and how to properly handle the mouse. While learning mouse operation, the student will learn to navigate Windows Desktop.

BMGT 101 Introduction to Entrepreneurship | (45 Lec/0 Lab=45 Hours)

This course provides students with an introduction to the potential and pitfalls of Entrepreneurship. Students will learn about the various methods for starting up, managing and financing a new venture. Students will get a chance to evaluate real world business plans and videos of entrepreneurs.

ACCT 101 Introduction to Bookkeeping | (25 Lec/20 Lab=45 Hours)

This course covers the fundamentals of accounting with the newcomer in mind. This course assumes students have no prior knowledge about accounting or finance and delivers lessons and examples to build accounting skills. Specifically, this class addresses accounting terminology, revenue, expenses, net income, the accounting equation, debits, credits, and balancing the accounting formula, the accounting structure, the accounting cycle, journals, ledgers, the trial balance and more. It also guides students to learn how to read financial statements properly, and how to grab meaningful information from the balance sheet, income statements and cash flow statements.

CSSF-101 Customer Service and Sales Fundamentals | (20 Lec/10 Lab=30Hours)

This course introduces entry-level services and sales associate as a tool to increase awareness of, and improve skills related to frontline work in customer service, sales, and a retail environment. The student will learn basic customer service and sales, and retail skills. This course is aligned

with the hospitality industry of occupations where customer service and sales skills are required. The Customer Service and Sales Fundamentals course is also designed to prepare students for the certification exam issued by the National Retail Federation.

Prerequisite: Student must complete CLIT-001. Failure to comply will result in the student being dropped from the class.

MOWC 101 Microsoft Office Word | (15 Lec/30 Lab=45 Hours)

Microsoft Office Word is designed to teach students Word skills used in daily administrative office duties. The student will also learn how to prepare for Microsoft Word Certification exam 77-881.

HOSP 101 Introduction to Hospitality | (45 Lec/0 Lab=45 Hours)

This introductory course acquaints the student with the scope and complexity of the hospitality industry by exploring the lodging and food service business industry. The course examines careers, professionalism, guest service, and safety and security.

HOSP 102 Rooms Division | (40 Lec/20 Lab=60 Hours)

This course introduces the student to the most revenue generated division of the lodging industry. The student will learn that the rooms division sell the room to the guests, checks them in, cares for the room, and provides them with round the clock services throughout their stay.

Prerequisite: Student must complete HOSP-101 or be concurrently enrolled. Failure to comply will result in the student being dropped from the class.

HOSP 103 Food and Beverage Division | (40 Lec/20 Lab=60 Hours)

This course develops the knowledge of basic principles and the importance of the food and beverage operation. Students will also learn how to establish the quality of the hotel in the eyes of the guest with emphasis on operation of a professional food and beverage facility.

Prerequisite: Student must complete HOSP-101 and HOSP-102 or be concurrently enrolled. Failure to comply will result in the student being dropped from the class.

BMGT 105 Business Communications | (20 Lec/25 Lab=45 Hours)

Introduces the student to a variety of technical and business writing theories and practices designed to be applicable to the production of business communication in the real world. It teaches the fundamentals of good business writing, including protocols for business letters, memoranda, electronic mail, good and bad messages, persuasive messages and formal reports and proposals. In addition, there will be instruction in oral presentation and in-depth practice on both an individual and a collaborative basis. Students will learn how to enhance their business communication with technically based media.

JOBS 100 Job Seeking Skills | (15 Lec/15 Lab=30 Hours)

This course is designed to teach students the employability skills needed to succeed in the workplace. The focus of this course is to teach students transferable skills necessary to succeed in the ever-changing workplace through teamwork, problem-solving, communication, self-management, and career readiness. Students will enhance basic soft skills, workplace skills,

interpersonal skills, communication skills, and leadership skills while becoming career-ready.

FACILITY, EQUIPMENT AND CLASSROOM ENVIRONMENT

Lot 5A and 33 of Square 607 of the First Municipal District, which square is bounded by Canal Street, South Broad Street, South White Street and Cleveland Street. Lot 5A commences 105.99 feet from the corner of S. White and measures 71.4' front on Canal Street by a depth of the sideline nearest South White of 146' by a first depth on the opposite sideline of 116.33, thence narrowing 1.93 by second depth of 29.69', by a width in the rear of 70.39'. As configured, Lot 5A contains a gross area 10,356.9 square feet. Lot 33 commences 166' from the corner of Canal Street and measures 30.74' front of South White Street by a depth of 120' between equal and parallel lines. As configured, Lot 33 contains a surface area of 3,698.8 square feet and is used for ancillary parking. The subject sites consist of two non-contiguous parcels in the same square of ground fronting on Canal Street in the square with South Broad. The larger of the two sites fronting Canal Street is presently improved with the three-story, brick façade over concrete block structure in use as a commercial college. This site contains a gross area of 10,356.9 square feet, is rectangular in shape and filled to a grade slightly above the elevation of adjacent roadways. No encumbrances, except for typical utility easements, that would restrict development options were noted. Access to the site is provided by a 20' alley off South White Street which runs parallel to Canal Street. This alley adjoins the larger subject lot to the rear and provides access to the first level parking area. The size of the particle site would be considered typical for Canal Street oriented sites in the neighborhood. The smaller of the two subject sites is on a side street perpendicular to Canal Street. It is not uncommon in the Mid-City area for Canal Street developments to rely on ancillary or satellite locations for additional off-street parking. This is the function of the smaller 3,688.8 square foot South Scott Street site. Both of the subject site straddle FEMA Flood Zone A and B. According to the most recent FIRM information (9-30-2016), the subject is in a flood zone that has a .2 percent annual chance flood hazard with a ground elevation of -2.4. Both sites are zoned Historic Urban Neighborhood Mixed Use District (HU-MU). This is one of the more flexible district regulating historic neighborhoods and provides for a wide variety of potential commercial used. The subject improvements include a three-story, raided brick over concrete block structure containing a gross building area, according to our archives, of 17,742 square feet. The first level of the elevated structure is used for parking and can accommodate 17 vehicles. The building was built in 1966 and is presently 51 years old, approaching the limits of its physical useful life. At the time of its original construction, the elevator pit and foundation were engineered to add two additional floors to the building. The foundation is a pile supported, grade level concrete slab. Interior finishes are typical for a building of this vintage, with a combination of vinyl and carpet over structure, sheetrock walls and suspended 2' x 2' acoustic tile ceilings with recessed fixtures. Restrooms are provided on each floor. The building is served by a single hydraulic passenger elevator and central air and heat. The roof is a flat, composite, built-up system. The building is served by a wet sprinkler system and fire alarm. The second floor is built out largely as administrative offices but does include three classroom areas that could be re-partitioned to serve in a more general purpose office function. By contrast, the third floor layout is more academically oriented with its nine classrooms. Should the current use be discontinued, the third floor would likely need to be reconfigured. While the design and finishes of the building are utilitarian, the structure appears to have been well maintained. This was no apparent evidence of deferred maintenance or abnormal wear and tear beyond what would be considered typical given the age of the building. Mechanical and roof systems were not inspected for soundness and are assumed to be in working order. The building is also assumed to be in compliance with current life safety, building and ADA codes. A layout of the site and the second and third floors follow this discussion.

FINANCIAL ASSISTANCE

Every attempt will be made to assist participants to find financial support for their training.

To receive these funds, participants must meet criteria of funding source. Fees paid by agencies can be paid on a monthly basis after service is rendered or in advance of services.

Individuals who do not qualify for financial assistance through participating partnering agencies must pay 50% in advance and the balance in monthly installments. All balances must be paid in full prior to program completion.

OTHER SPECIAL ASSISTANCE

Special Assistance and services are provided to individuals who are disabled and/or have other disabilities with barriers to employment:

- Over fifty years of experience working successfully with targeted populations.
- Staff experienced and knowledgeable about various disability groups, including rudimentary sign language.
- Network with other agencies that assist the disabled and disadvantaged populations.
- Access to information on adaptive devices and adaptations to work places for those with physical challenges.
- Pre-requisite classes intended to address issues faced by targeted populations. Goodwill programs initially determine needs, wants and develop an individual vocational plan to attain realistic vocational goals at each phase of the program. Programs will address modifying basic work habits, behaviors and attitudes; emphasize skills training placement, and follow-up. Other concerns addressed include problem-solving skills, communication skills, self-esteem, listening skills, self-confidence, self-discovery and self-image.
- Adult Basic Education is offered to participants who may benefit from improving math, reading, writing, and spelling in order to be successful employed.

- Job placement and job retention assistance through post-employment case management.
- Substance abuse prevention and social service referrals are available to certain populations.

WORK EXPERIENCE-BASED EMPLOYMENT TRAINING

Work experience is intensive services under Workforce Innovation and Opportunity Act (WIOA). Work experience is a planned, structured learning experience that takes place in a workplace setting for a limited period of time. Work experience functions as a workplace-values activity for the acquiring of behavioral competencies and specific occupation or job skills.

It is a strategy for participants who have little or no work experience in situations where an employer can offer a meaningful experience.

Although an employer may also receive some benefit from work experience in the form of work being done or recruiting a potential new employee, the primary goal is to benefit the participant. The use of work experience is based on an assessment and service strategy identified in an Individual Employment Plan (IEP).

Work experience may be combined with classroom instruction relating to the work experience position, occupation, industry or basic skills and abilities to successfully compete in the local labor market. Work experience is an intermediate employment step toward the long-term goal of moving along a career path and may be conducted in the private for-profit, private non-profit and public sectors. A likely candidate for work experience is a participant who is appropriate for long term employment in a particular industry or occupation, but does not have all of the skills or the experience to qualify for entry-level employment in the field.

JOB PLACEMENT SERVICES

Goodwill Technical College employs three (3) job placement specialists who will be available to assist clients with resume preparation, job interviewing skills.

Approximately 2 months prior to completion, clients will work with employment specialist to actively seek and interview for jobs related to their field of study. However, although job placement assistance is offered, we cannot guarantee employment.

SCHOOL REGULATIONS

Participants must adhere to the school's guidelines for personal behavior. These are based on common practice in the business community and should be viewed as part of the participants' preparation for the workforce.

Administration and Faculty

Administrative Staff

William Jessee, President – A proven leader with forty-one years successful experience providing fiscal management, operations leadership, strategic planning and customer relations. Brought back the organization (Goodwill Industries of Southeastern Louisiana, Inc.) from Hurricane Katrina. A proven track record of expanding the annual operating budget for the organization and the other non-profit organizations he led. Expanded annual operating budget for the total organization from \$9.5 million to over \$30 million. Annually manage \$4 million dollars in federal contracts related to services for people with disabilities and other disadvantaging conditions and another \$2 million in service contracts with federal and state agencies. Obtained 20 commercial contracts and started new warehousing business line. Overseas management of 23 stores with an annual income of approximately \$20 million dollars. Additional areas of expertise include: strategy, vision & mission planning, profitability & cost analysis, contract negotiations, finance, budgeting & cost management, public relations, policy & procedure development and team building & performance improvement.

Jodee E. Daroca, CPA, Vice President/Chief Financial Officer-- Senior executive with proven expertise working for a non-profit. Key leader for change during the rebuilding of the New Orleans Goodwill following Hurricane Katrina (\$12.9M to \$31M revenue) Strong proponent of mission integration and community impact. Extensive experience collaborating with members of the Board of Directors to drive strategy and ensure proper governance. Adept at managing relationships with outside professionals in the areas of Accounting/Audit, Law, Insurance, and Banking. Proven track record of working with department heads to create operational changes. Strong communication skills utilized to build strong community relationships and internal consensus. Proven leader that can bring external partners and internal teams together to achieve strategic goals. Previously employed in manufacturing and banking, including experience in highly regulated industries during periods of intense change. Servant leader with ability to analyze each situation and devise creative workable solutions that energize her colleagues.

Kim Evans Rugon, PhD, Vice President of Workforce Development and Institutional Advancement – has over 35 years of experience in vocational and technical education and workforce development. She was a secondary business teacher, an accounting and business instructor at the community and technical college and is an adjunct college professor. She has over 15 years of school leadership serving as an Assistant Dean, a Campus Dean, Dean of Curriculum and Instruction, Vice Chancellor of Technical Education, Executive Dean and Vice President. She is responsible for workforce development programs at Goodwill Industries of Southeastern Louisiana and is credited for the creation of the Goodwill Training Center. In addition, she has secured over \$10 million dollars in grant funding for disadvantage and special populations. Dr. Rugon oversees all of Workforce Development in 3 parishes and is the chief academic officer of the Goodwill Training Center.

Jerilyn Collins, Director of College Academics - is a native of New Orleans and has over 25 years of leadership and management experience. She has served in many industries including retail, telecommunications and post-secondary education. Her roles included Regional Trainer, Store Manager, Business Instructor, Student and Faculty Liaison, General Education Department Chair, and Business Department chair. She graduated from the University of Phoenix with a

Bachelor of Science degree in Business Management and master's degree of Business Administration. She also holds a Master's of Science Management with a Concentration in Organizational Leadership from Colorado Technical University. She is currently pursuing a Doctor of Management in Organizational Leadership from the University of Phoenix. She has been successful in helping organizations enhance customer service awareness, implementing coaching and development for faculty and staff continuous improvement and building and/retaining student relationships through strategic retention programs.

Joe Benson, Director of Finance and Administration – is a Certified Public Accountant with over 30 years of financial and management experience. He began his career as an auditor with an international accounting firm and has spent the last 26 years in progressively senior positions with International-Matex Tank Terminals, a New Orleans-based transportation/logistics company. He has diverse experience in many areas of accounting and finance (financial reporting, budgeting, financial modeling, auditing, et al). Joe earned a Bachelor's degree with a Psychology major from Tulane University and attended business school at the University of New Orleans.

Audry Hill, School Admissions Clerk – has over thirty years of Administrative experience. Audry completed the Microsoft Office Technology Training (MOT) program in 2015. She was hired with Goodwill Industries' School upon completion of training. Her background is in real estate as a Licensed Agent for 20 plus years. Her Customer Service Skills and her passion for supporting people have awarded her the opportunity to assist in navigating those individuals who are seeking training and new job skills. She handles the collection of registration and tuition fees, along with various other administrative tasks. She is responsible for the students' admission documents and attendance reports. Audry oversees all the official student files and student recruiting.

Asa Lattimore, School Counselor – A native of Chicago relocated to Milwaukee and began her career in the healthcare field in 1987 and developed a passion for computers in 1995. She decided to obtain a Bachelor's Degree in Healthcare Administration while continuing to work in the healthcare field. She has taken several business courses over the years and has received certificates in computers which allowed her to teach Microsoft Office Software, various computer software programs, and web design courses for ten years while still working in the healthcare field when she moved to Zachary, LA. While teaching in post-secondary education, Asa worked with students who had barriers that interfered with reaching their educational goals so she decided to attain a Master's Degree in Education and worked toward her doctorate in Higher Education Administration to help students reach their desired goals. She is currently working toward her degree in Clinical and Counseling Psychology. Asa volunteer with North Shore Counseling and with Court Appointed Special Advocates (CASA).

René Gill Pratt, Retention Specialist – Has over twenty plus years in education within the New Orleans area. She earned her undergraduate degree from Dillard University in Elementary Education and a Master's degree in Special Education from the University of New Orleans. She was a Compliance Facilitator with Orleans Parish Schools. She also was an Assistant Professor, Director of Admissions, Recruitment and Retention at Southern University of New Orleans. She is very active in her community where she has served in many leadership positions and is actively involved with many civic and community organizations.

Faculty

Nathaniel Hogan, Digital Literacy and Microsoft Office Technology Instructor – A native New Yorker with deep Louisiana roots is an IT Professional. He is a desktop support expert, hardware/software specialist, and teaches end users Windows OS, Microsoft Applications and other related software. Nathaniel is a Citrix Certified Administrator, certified IC3 expert, and certified Communications Technology Technician. In addition he is also a brass musician and music instructor. He volunteers his time to coaching and teaching youth sports.

Shaleska Julian, Hospitality START-Hospitality/Customer Services and Sales Instructor – A native of New Orleans. She graduated from the University of Louisiana at Lafayette with a Bachelor's of Science Degree in Child and Family Studies. During college Shaleska worked as an Assistant manager in the Northgate Mall. She was recognized several times for her low numbers from the loss prevention department. After graduating, Shaleska worked as an elementary private school teacher for many years. She later decided to find a career in which she could help more children. She then worked as a learning advocate for the Children's Defense Fund. During this time she helped dozens of families with resources that aided them with medical insurance, mental illness, housing, parenting/life skills much more. She was later brought into the hospitality industry part-time with her mother. Shaleska became S.T.A.R.T. certified and now is a Guest Service Professional. Currently, Shaleska still works part-time for special events.

Pamela Kerby, Medical Billing and Coding Instructor – A native of Lakeland, Florida attended Tulane University, University of New Orleans, and received her Undergraduate Degree from the University of New Orleans in Political Science. She earned her MBA from the University of Phoenix with a concentration in Health Care Management. She also earned a DRMS from Grenoble Ecole De Management in Grenoble, France. Pamela worked in health care for the past twenty-three years. Her years of teaching experience is in Medical Health Care Administration, finance, medical billing and coding, health record management, insurance and reimbursement, anatomy and physiology, and health care management.

Lois Spaulding, Microsoft Office Technology Instructor – A native of New Orleans has over twenty years of education, administrative and technology experience. She is a graduate of Southern University at New Orleans with a Bachelor's of Science in Computer Information Systems and Associate in Computer Science. She earned several technology certifications as a Microsoft Certified Professional, System Administration, System Engineer, Microsoft Office Specialist, and Internet, Computing, and Core Certification (IC3). Lois is currently pursuing her Master's in Business Administration. As Director of Educational programs, she developed certified training programs and managed day to day operations of school. As Program Manager of the Computer Technology Center for Broadband Technology Opportunity Program (BTOP), she oversaw twenty-two training labs and provided training for over three thousand students within two years. Lois is genuinely passionate about helping people.

Vanessa Sumler, Medical Billing and Coding Instructor – Is a Certified Medical Billing and Coding Specialist (CBCS) from Cameron College, Certified Coding Associate (CCA) from American Health Information Management Association (AHIMA), Certification in Integrative Mental Health, Medicaid Certification and Associate Degree Penn Foster College in Healthcare Management. She is a member of American Academy of Professional Coders (AAPC), and

AHIMA. She is also a licensed NHA proctor. Vanessa work for a Non-Profit Mental Health Organization for ten years as the Claims Manager. She expanded the Claims Department by hiring and teaching over fifty Claims Specialist medical billing and coding, processing claims, health records, insurance, reimbursement, appeals and denials HIPAA laws and regulations. She is dedicated and motivated in helping others succeed in the Healthcare field.

Joy Alexander, Adjunct Instructor –Joy Alexander comes to us with over 35 years’ experience preparing students to enter the workforce. With a bachelor’s degree in Business Administration and a master’s in Business Education plus contact with business managers, her area of expertise consists of all areas of the business arena from office clerk to entrepreneurship. In all areas she places an emphasis on operating efficiently through the use of technology.

James L. Conrad, Jr., Adjunct Business Instructor– A native of New Orleans, LA, he has close to thirty years of experience working for non-profit institutions and nearly twenty years of experience working in education. He is a graduate of Loyola University New Orleans with a Bachelor of Business Administration Degree in Marketing and Management. He attained his Master of Education Degree with a concentration in Curriculum and Instruction from the University of Holy Cross in New Orleans, LA. He has worked as a charter and private school teacher at the elementary and middle school levels and he tutored secondary students for College Track New Orleans. Mr. Conrad has higher education experience as an instructor at Delgado Community College, Northshore Technical Community College and Southern University at New Orleans. He has served as the Job Readiness Instructor/Coach at Goodwill Industries of Southeastern Louisiana, Inc. since October 2016.

Lisa Frazier, Adjunct Business Instructor-- Lisa has been an Adjunct Instructor at Herzing University since April 2015, teaching various business courses, including Marketing, Introduction to Management and Project Management, Micro and Macro Economics. Lisa has over 28 years of experience in Asset Management and Training. She is currently the Collections Manager for the largest Credit Union in the River Parishes located in Laplace, LA. Lisa holds a Bachelor of Arts degree in Business Administration and a Master of Arts in Organizational Management degree from the University of Phoenix. Lisa enjoys meeting, mentoring and empowering students journeying through their academic paths in an effort to realize their full potential.

Tanika Coston-Andrews, Adjunct Medical Coding and Billing--is an entrepreneur and a New Orleans native. She has been billing and coding for 15 years working for different companies around the New Orleans area. Her experience ranges from a billing department manager, classroom instructor and specific projects where she was the only coder on-site. She currently owns a billing company that does billing and coding for multiple businesses. Her specialties are Optometry and Mental Health.

Kervin Doyle, Adjunct Math and Business Instructor-- has been a practicing attorney for many years in Louisiana. He serves as the Chief Executive Officer of Kervin W. Doyle and Associates. He has served an instructor at Remington College, Southern University and Herzing University. He brings the practical experience of a diverse legal practice to the classroom. He knows from teaching that hands-on experience and repetition are important keys to the successful student. His facilitation of the classroom is very engaging and functional in helping

students develop their critical thinking skills.
