Council On Occupational Education Visit (July 12-16, 2021)

Goodwill Technical College (GTC) is currently going through accreditation with the COE.

- COE evaluates and accredits career and technical colleges, as well as institutions that offer associate's degree programs. It is recognized by the U.S. Department of Education as a national accreditor. In order to become accredited, the college must fulfill certain criteria, be licensed by the state, and must operate for at least one year as a licensed post-secondary institution. The institution must demonstrate financial stability, educational quality and student achievement. During the visit, COE will thoroughly evaluate the college, inspect policies and procedures, and even interview staff and students to ensure the college meets the standards for accreditation. The visit will either be in person or virtual, due to COVID-19.
- **Why is this important?:** Accreditation is a status granted to an educational institution or program that has been found to meet or exceed stated criteria of educational quality and student achievement. Accreditation by COE is viewed as a nationally-honored seal of excellence for occupational education institutions such as Goodwill Technical College and denotes honesty and integrity. Accreditation ensures academic quality. Additionally, being accredited by COE allows credit you've earned at GTC to be transferable to other COE accredited institutions.
